Ideation Phase

Define the Problem Statements

Date	31 January 2025
Team ID	
Project Name	Employee Issue Management System
Maximum Marks	2 Marks

Customer Problem Statement Template:

Create problem statements to understand the employee's point of view. The Customer Problem Statement template helps focus on what matters when creating an effective Employee Issue Management experience.

A well-articulated problem statement allows the project team to understand the challenges employees face while reporting workplace issues and helps define a suitable ServiceNow solution through the Service Portal and Record Producer.

Example:

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	an employee	raise a workplace issue such as a payroll discrepancy, access problem, infrastructure request, or HR policy clarification	I currently have to rely on email or informal communication channels	there is no standardized way to capture the issue details or track the request	uncertain about whether my issue has been properly recorded and when it will be resolved
PS-2	an employee	submit my issue and know its current status	issue prioritization, assignment, and follow-up can be inconsistent	HR and support teams may have to manually collect information and manage requests through different communication channels	frustrated by delays and lack of visibility into my issue
