| **Team ID** | N/A — Individual Project |
| **Project Name** | Employee Raise Issue Management System |
| **Maximum Marks** | 4 Marks |

## Solution Architecture:

The architecture illustrates how the employee-facing portal, Record Producer, configuration rules, and custom table work together in ServiceNow to capture and store employee issues.

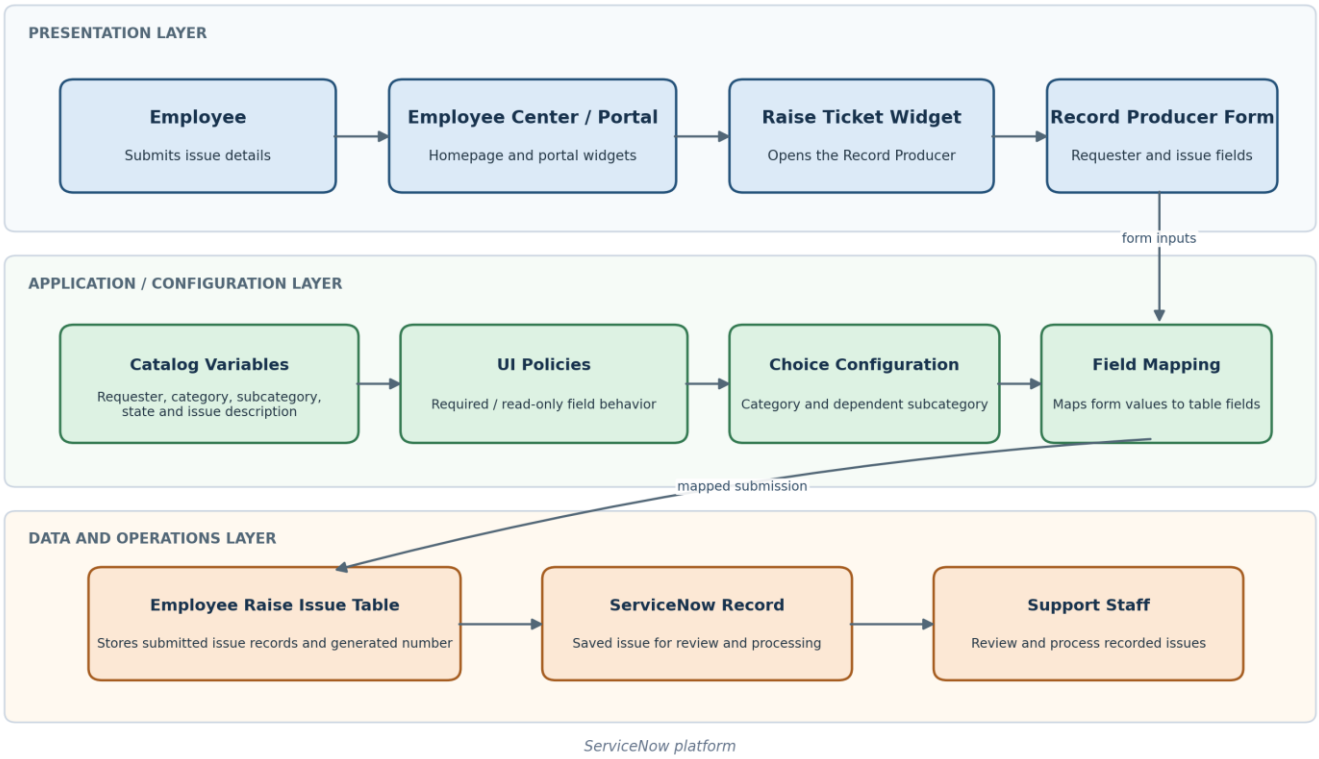

*Figure 1: Solution architecture of the Employee Raise Issue Management System.*

## Key Components

| Component | Purpose |
|---|---|
| Employee Center / Service Portal | Provides the page and widgets used to reach the issue submission form. |
| Record Producer | Collects requester and issue information. |
| UI Policies and choice configuration | Apply configured field behavior and guide category/subcategory selection. |
| Employee Raise Issue table | Stores submitted records for later review and processing. |
