EMPLOYEE ISSUE MANAGEMENT SYSTEM

Customer Journey Map — Employee raises and tracks a workplace issue

SCENARIO An employee identifies a workplace problem, submits it through the ServiceNow Service Portal, and follows it through to resolution.

JOURNEY ROW	1. Discover	2. Access	3. Select	4. Describe	5. Submit	6. Track	7. Resolve	8. Feedback
STEPS	Find where to raise an issue	Open the Employee Issue portal page	Choose a suitable category / subcategory	Enter issue details and required fields	Review details and submit the form	Return to portal or issue record to check progress	Respond to requests and wait for resolution	Review the result and provide feedback if available
EMPLOYEE ACTIONS	Ask a colleague or look for the portal link	Sign in and navigate to the issue submission page	Select the issue type that best matches the problem	Enter description and other displayed details	Submit the request and note any confirmation	Check current status and read any updates	Provide extra information when requested	Confirm whether the issue has been addressed
TOUCHPOINTS	Internal instructions, colleague, intranet	ServiceNow Service Portal	Record Producer category and subcategory choices	Record Producer fields, UI Policies and form guidance	Submit button and confirmation / created record	Portal page or issue record (as configured)	Assigned support team and status updates	Resolution notes or feedback mechanism (if configured)
GOALS & MOTIVATIONS	Understand the correct place to report a problem	Reach the reporting form quickly	Choose the right issue category	Explain the problem accurately without confusion	Submit successfully and know it was recorded	Know who is handling the issue and what happens next	Get a timely, useful resolution	Feel heard and confident the issue was handled
POSITIVE MOMENTS	Clear instructions are easy to find	Portal page is easy to access	Categories are understandable	Helpful field labels and dependent choices guide entry	Form accepts the submission and confirms completion	Status is visible and updates are understandable	Support team communicates clearly	Issue is resolved and outcome is explained
PAIN POINTS / NEGATIVE MOMENTS	Employee does not know where to report an issue	Portal link or page is hard to find	Categories may not match the employee's problem	Required fields or dependencies may be confusing	Validation errors or unclear confirmation create doubt	No visible update can make the employee feel ignored	Slow response or repeated requests can be frustrating	No feedback option or unclear closure can reduce trust
AREAS OF OPPORTUNITY	Provide a clear portal entry point and short instructions	Keep the page simple and mobile-friendly	Use clear category/subcategory labels and examples	Show only relevant fields and explain required information	Provide a clear success message and issue reference	Display status, owner and latest update where configured	Send notifications and define ownership / escalation rules	Add a simple feedback step and use results to improve service

Project note: This map reflects the planned Employee Issue Management workflow using a ServiceNow custom table, Record Producer, UI Policies/dependent choices, and Service Portal. Items such as notifications, visible ownership, resolution notes, and feedback should be described as implemented only if they are present in the final instance; otherwise treat them as improvement opportunities.
