Project Design Phase-II

Data Flow Diagram & User Stories

Date	14 October 2026
Team ID	
Project Name	Employee Issue Management System
Maximum Marks	4 Marks

Data Flow Diagrams:

A Data Flow Diagram (DFD) shows how information enters, moves through, and leaves a system. Employees submit workplace issues through the Service Portal using a Record Producer. ServiceNow validates the information and stores it in the custom Employee Raise Issue table. The appropriate HR or support team reviews the issue, updates its status, and records the resolution.

EMPLOYEE	→	**SERVICE PORTAL RECORD PRODUCER**	→	**EMPLOYEE RAISE ISSUE CUSTOM TABLE**
		Validates required fields		
ISSUE STATUS / CONFIRMATION	←	**HR / SUPPORT TEAM Reviews and resolves**	←	**ISSUE ASSIGNMENT**

Process flow: Employee submits an issue → ServiceNow validates required information → a record is created in the Employee Raise Issue table → HR/Support reviews and resolves the issue → the employee can check the status and receive confirmation.

User Stories

The following user stories describe the main functions of the Employee Issue Management System.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance Criteria	Priority	Release
Employee	Submit Employee Issue	USN-1	As an employee, I can submit an issue by selecting a category and entering a short description and details.	Required fields are validated and a new record is created in the Employee Raise Issue table.	High	Sprint-1
Employee	Submit Employee Issue	USN-2	As an employee, I can provide relevant information such as issue type, description, and contact details.	The record contains the submitted information and a confirmation or reference number is displayed.	High	Sprint-1
Employee	Track Issue	USN-3	As an employee, I can check the status of an issue I have raised.	The employee can view the current status and reference number for their own issue.	High	Sprint-1
HR / Support Team	Issue Assignment	USN-4	As a support team member, I can view issues assigned to my team.	Authorized team members can view assigned issues and their relevant details.	High	Sprint-2

User Stories

Issue handling, notifications, and administration.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance Criteria	Priority	Release
HR / Support Team	Issue Resolution	USN-5	As a support team member, I can update an issue's status and add resolution notes.	Authorized users can update the status and save resolution notes on the issue record.	High	Sprint-2
Employee	Notifications	USN-6	As an employee, I can receive an update when my issue is submitted or its status changes.	A confirmation or status notification is triggered for the relevant issue event.	Medium	Sprint-2
Administrator	Configuration	USN-7	As an administrator, I can manage issue categories and assignment rules.	Authorized administrators can maintain categories and routing or assignment settings.	Medium	Sprint-2
Administrator	Access Control	USN-8	As an administrator, I can restrict issue records to appropriate users and teams.	Access controls prevent unauthorized users from viewing or changing issue records.	High	Sprint-2

Note: These user stories are a project-specific draft. Adjust the acceptance criteria if your final ServiceNow configuration uses different fields, assignment rules, or notification behavior.
